To Whom It May Concern,

I am writing to wholeheartedly recommend Claire Lefez based on my experience working with her during her internship in Bristol in the summer of 2023. Claire was an exceptional intern who made an indelible impact during her time with us.

Claire undertook two projects during her internship, each of which demonstrated her exceptional skills and commitment. The first project involved the innovative use of bioplastics to create inflatable structures. This project was not only significant for our research group but also in preparation for a paper we intend to submit to a major conference in the field of Human-Computer Interaction (HCI). Claire's creativity and independence in tackling this project were impressive. Her mature approach to the work she performed was beyond her years.

Additionally, Claire was simultaneously engaged in a project in partnership with AirGiant, a Bristol-based Robotic company. This project focused on the exploration of large inflatable robots. Claire played an instrumental role in constructing a structure that allowed people to interact with and learn about fabric and air actuation. Her ability to bridge the gap between academia and industry showcased her adaptability and practical skillset.

In addition to her technical abilities, Claire was a pleasure to work with. Her friendly and cooperative nature made her a fantastic addition to our research group. She seamlessly integrated with both our research team and the social fabric of our workplace. Claire's ability to interact effectively with colleagues and collaborators enhanced the overall work environment and contributed positively to the group dynamic.

Claire's proficiency in applying methods in HCI was notable, and her work added substantial value to our ongoing projects. In all respects, Claire proved herself to be a highly dedicated, responsible, and motivated intern. She is a student with whom I had the privilege to work, and I have no doubt that she will excel in her future endeavours.

In conclusion, I wholeheartedly recommend Claire Lefez for any academic or professional pursuit she chooses to undertake. Her creative thinking, independence, and interpersonal skills are exemplary, and she will undoubtedly be an asset to any team or organization. Should you have any questions or require additional information, please do not hesitate to contact me.

Sincerely,  
Prof. Anne Roudaut
